Warnings and caution signs, illustrated below, are posted throughout this manual as well as on the AVN6620. They show safe and correct ways to handle the product to prevent personal injury to you and others and avoid damage to property. Before reading through the manual, take time to read through and learn the important information listed in this section.

**Cautions for use**

* The illustrations of screens shown in this manual may differ from the actual screens of this product.

---

**Warning**

This WARNING sign indicates a situation in which incorrect handling through disregard of a sign may result in death or serious personal injury.

**Caution**

This CAUTION sign indicates a situation in which incorrect handling through disregard of a sign may result in personal injury or may result solely in damage to property.

The symbol shown below indicates that you should know about the information in order to carefully follow it or you should remember the information for its helpfulness.

---

This ATTENTION sign indicates helpful information to remember and know.

- Please read all materials such as manuals and warranties that have come with the product.
- Eclipse will not be responsible for unsatisfactory product performance due to failure to follow these instructions.
- Changes to product specifications may result in differences between content of the manual and features of the product.

---

LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF AS HAZARDOUS WASTE ACCORDING TO LOCAL, STATE, OR FEDERAL LAWS APPLICABLE TO YOU. DO NOT PLACE IN THE TRASH.

Introduction

How to use this manual

Adjusting sound quality

Setting DSP (acoustics)

The DSP function reproduces the sensation of various factory set performance environments by adding reverberation to the music being played.

Touching the DSP touch switch brings up the acoustics mode screen as shown.

- Touch BACK after changing settings. The acoustics mode adjustments will be saved and the system will return to the previous operation screen.

<table>

</tbody>
</table>

Adjusting, saving DSP (acoustics)

The factory set DSP (acoustics) level for each mode can be adjusted to preference and saved.

Touch or at the right of the screen while in the acoustics mode to be adjusted.

- There are five + and five - adjustment levels available.

Touch the switch for the acoustics mode that has been adjusted until a beep is heard.

Detailed operation title

A title is assigned for each detailed operation.

Operation procedure

Describes the operation. Proceed with the operation as per the numerical order.
Introduction

Basic operation

Default settings for the currently adjusted and saved DSP (acoustics) level can be reset.

1 Touch **OFF** until a beep is heard.
   - The acoustic level will be returned to default value (the default value is "0").

When adjusting the level for the currently selected DSP (acoustics) mode, the level will not be saved for other acoustics modes.

Attention

Additional points regarding the operations are given here.

Go to the next page

The operation procedures are continued on the next page.

The description shown above is for explanation, and therefore it may differ from the actual one on the same page.
Features

**DVD player with sharp video and dynamic sound (Page 94)**

Plays DVD Video recorded with high quality images and sound.
(DVD media is able to record a movie with high quality video and digital sound that exceeds the quality of CD media.)

**The MP3/WMA player that can play a disc holding many music tracks equivalent to several albums (Page 72)**

The MP3 compression technology that can compress the music data by a factor of 10.
The CD-R/RW discs holding MP3/WMA data can be played with this unit. Also, WMA data which provides higher compression rate than MP3 can be played.

**DSP effects for simulating acoustics of various performance environments (Page 30)**

Provides ability to simulate the sensation of various performance environments for matching to the genre and source of a song.
Selection and display of favorite wallpaper (screen backgrounds) (Page 44)

Wallpaper of your choice can be switched and displayed for use as the background of the information screen and audio playback screens.

The screen from a navigation unit can also be linked and selected.

Radio tuner for receiving various broadcasts

- **AM/FM tuner (Page 50)**

  Enables reception of analog AM/FM radio broadcasts.

- **HD Radio tuner (Page 56)**

  Enables reception of HD Radio broadcasts.
Features

- **SIRIUS tuner (Page 60)**
  SIRIUS is a satellite broadcasting service offering music, news, sports and other programming with CD-quality sound; This is a paid subscription service.

- **XM tuner (Page 64)**
  XM tuner is a satellite broadcasting service offering music, news, sports and other programming with CD-quality sound; This is a paid subscription service.

System additions

- **CD changer (Page 84)**
  A CD changer enables non-stop playing of multiple discs, for convenience at times such as taking a long drive.
  It is easy to search for and play a song from among the discs on a changer.

- **iPod (Page 88)**
  When an optional iPod interface adaptor (iPC-106) is connected to this main unit, it is possible to operate the iPod® with this main unit and to display information relevant to it on the screen of this main unit, so you can listen to the songs stored in the iPod.
- **TV tuner (Page 120)**
  Television can be watched if an optional TV tuner is connected.

- **VTR (Page 118)**
  Connecting a VTR deck enables watching of video tapes.

---

**TEL MUTE**

By connecting a handsfree cellular phone adapter with the TEL-MUTE function, the audio is automatically muted when an incoming call is received. Note that the voice guidance is not muted. (For muting on outgoing call, refer to the operation manual of the handsfree cellular phone adapter.)

---

**Easy-access audio controls on the steering wheel (Page 140)**

You can select the radio channel and perform CD, MP3 and DVD operations using the easy-access switches on the steering wheel. (This function is only available on vehicles fitted with steering wheel switches.)
Before using the main unit

- Be very careful and pay full attention to safety when operating the audio controls while driving, otherwise accidents may occur. Also be sure to set volume so that you can still adequately hear sounds outside the vehicle. Improper use can contribute to a traffic accident.

- Never continue to use the system if it is malfunctioning in any way. If smoke, abnormal noises or abnormal odors are noticed, turn off the power immediately. Immediately turn off audio in such situations.

- Exercise caution as to the temperature inside the vehicle. The temperature inside the vehicle can increase during hot weather. Wait for the temperature inside the vehicle to drop before using the unit. Damage could result.

- Do not disassemble or modify the main unit. The main unit has a precisely designed structure, so consult your retailer in the event of any unsatisfactory performance.
• Do not apply excessive force to the monitor. Damage could result.

• Do not place items such as cups or cans on top of the monitor, and do not leave the monitor tilted down when not in use. Damage could result.

• Do not insert any objects other than discs into the disc slot. Damage could result.

• Be careful not to get fingers or other objects behind the monitor when it is being retracted into place. Interference can cause an injury or damage the main unit.

• When removing a disc from the main unit, remove it in the horizontally level direction. Do not pull them up forcibly or press down on them strongly while removing them. Improper removal can scratch the disc, cause the main unit to make noise or result in other damage.
Before using the main unit

About discs

- Water droplets can form on the inside of the main unit during cold or rainy weather in the same way car windows can fog up (This is condensation). When this happens, the audio can jump and playback can stop, so ventilate or dehumidify the vehicle for a short time before operating the equipment.
- To safeguard the components of the player, the unit will automatically stop when a malfunction occurs. If the player will not operate even when messages displayed on the screen are followed, consult with your equipment retailer, because it is possible that the unit has been damaged.
- It is possible that the sound will skip if the vehicle experiences violent motion on rough roads.
- Please do not use a commercially available lens cleaner because it may cause damage to the pickup of the player.

About playable discs

- An audio disc or DVD video disc bearing one of the marks below can be played. When using DVD-R/RW (DVD-Recordable/ReWritable) and DVD+R/RW (DVD+Recordable/ReWritable) discs, note that only those whose contents were recorded in the video mode can be played. Discs whose contents were recorded in the video recording (VR) mode and audio mode cannot be played.

- Discs that are compatible with Dolby Digital and bear the indication below can be used.

Manufactured under license from Dolby Laboratories, Inc. “Dolby” and the double-D symbol are trademarks of Dolby Laboratories.

- It is possible that a CD-R (CD-Recordable) or CD-RW (CD-ReWritable) disc will not play on the main unit due to the circumstances of the recording, special disc characteristics, scratches, dirt or deterioration caused by long storage in the vehicle. In addition, a CD-R or CD-RW disc written with CD-R, CD-RW or UDF format that has not been finalized will not play on the main unit.
- It is possible that a DVD-R/RW (DVD-Recordable/ReWritable) or DVD+R/RW (DVD+Recordable/ReWritable) disc will not play on the main unit due to the circumstances of the recording, special disc characteristics, scratches, dirt or deterioration caused by long storage in the vehicle. DVD-R/RW or DVD+R/RW discs that have not been finalized will not play on the main unit. It may not be possible to play a disc that has been recorded on a personal computer, depending on the application setting and the environment.
- The CD-TEXT function can be used only with the original CD-TEXT-compatible compact discs. If it is used with CD-R or CD-RW discs, characters may not be displayed normally.
- Do not use discs with transparent or semi-transparent portions within the recording area, or see through discs, since they may not be accepted and ejected properly and may not play properly.
About handling discs

- Be sure to store discs in their cases and keep them out of direct sunlight. Discs can warp and become unusable.

- Do not apply paper-based tape to either the recording side or label side of a disc. Damage could result.

- Do not use discs on which there are cracks or large warps. Damage could result.

- Do not touch the recorded side of a disc when handling it. (This is the side with the rainbow-colored reflection.) The disc may become dirty and that could cause the sound to skip.

- Using a disc that has become dirty can scratch the disc and cause the sound to skip. Use a commercially available compact disc cleaner to clean a CD, wiping lightly from the center to the edge.

About new discs

- You may notice that some brand new discs are rough around the center hole or outside edge. Remove the rough edges with the side of a ballpoint pen, etc and clean any flakes off the disc. Flakes from the rough edges may stick to the recorded surface and interfere with playback.
Before using the main unit

**About rental discs**

- Do not use CD discs with attached cellophane tape, rental CD discs with glue protruding from labels or discs with the residue of peeled adhesives. Using discs with those conditions can prevent the player from properly opening and closing as well as cause other damage.

**About specially shaped discs**

- Specially-shaped or octagonal CDs, like heart-shaped cannot be played. Do not attempt to play them, even with an adapter, since they may damage the player.

**About disc accessories**

- Do not use accessories (stabilizers, protective seals, laser lens cleaners, etc.) sold for "improving sound performance" or "protecting CDs." The changes in CD thickness or outside dimensions made by these accessories may cause problems in the player.

- Please be sure NOT to attach any ring-shape protector (or other accessory) to your discs. Those protectors are commercially available and said to protect discs and to improve sound quality (and antivibration effect), but they can do more harm than good in regular uses. The most common problems are Insert/Eject related problems and "No playback" problems due to the protector ring that may have come off in the disc mechanism.
About TV

- When connection with the battery is cut due to changing it, changing fuses, etc., all preset channels will be erased.
- It may be difficult for the TV to maintain optimal reception due to variation in signal strength or interference from other objects. The main causes of interference are listed below.
  - Visual or audio static may result when in close proximity to overhead train wires, high-tension wires, traffic signals, neon signs, etc.
  - Depending on the signal, buildings and mountains may adversely affect reception.
  - Visual or audio static may result when in close proximity to radio broadcasting or ham radio antennas.
  - Signal reception will become extremely weak when driving through a tunnel.
  - Signal reception will become weak when traveling at a great distance from the broadcasting station.
  - In some areas, visual or audio static may result when in close proximity to TV or radio towers. This is due to the influence of electro-magnetic waves outside of the reception range.

About the LCD panel

- The LCD panel can appear to be white or black when seen from certain angles.
- The screen will be difficult to read when external light such as sunlight falls on the display.
Basic operation

Switching mode

The main unit can be used when the vehicle’s ignition switch is on or in the ACC position.

- The main unit supports use of a remote control. The optional remote control is sold separately and can be purchased at your local retailer. Refer to page 144 for instructions on operation of the remote control.

Switching the mode

Switching the mode using panel switches

1. Press \textbf{MENU}.

2. Touch \textbf{SOURCE} on the MAIN MENU screen.
   - The AUDIO MENU screen will be displayed.

3. Touch \textbf{FM}.
   - The various audio modes can be selected by touching the corresponding touch switches.
   - When the navigation screen is being displayed before pressing \textbf{MENU}, the selected mode will be displayed on-screen over the background.

On-screen display
Switching the mode using touch switches

1 Touch the SOURCE MENU switch.

2 Touch the touch switch of the source you want to operate.
   - The operation screen for the selected source is displayed.
   - Touching \( \square \) returns to the previous screen.

Displaying operation screen

1 Press \( \text{AV} \).
## Operation screen of each mode

The operation screen for each mode will appear as shown below.

- **AM radio operation screen**

- **FM radio operation screen**

- **XM operation screen (optional)**

- **SIRIUS operation screen (optional)**

- **HD Radio operation screen (optional)**

- **CD player operation screen**

- **MP3/WMA player operation screen**

- **DVD player operation screen**

- **CD changer operation screen (optional)**

- **VTR operation screen (optional)**
When the operation screen for DVD or video (VTR/TV) has not been operated for 6 seconds or more, the operation screen will automatically be canceled.
Basic operation

Adjusting the volume

Adjusting main volume

1. Press the VOLUME switch.

Pressing $+$ will increase volume.

Pressing $-$ will decrease volume.

- Each press of the switch will change the volume by two steps. When the volume reaches 50 or higher, the switch will change the volume by one step. Holding the switch will continue to change the volume.
**Adjusting sound quality**

To adjust sound quality, touch the DSP, EQ or POS switch while the operation screen for a mode is displayed. Adjustments made in any mode will be saved and applied to all modes.

In the DVD mode, display the sound quality adjustment switches by touching **SET** from the operation modes, and then **SET**. In the VTR mode display them either by touching **SET**.
Adjusting sound quality

Setting DSP (acoustics)

The DSP function reproduces the sensation of various factory set performance environments by adding reverberation to the music being played.

**DSP mode setting**

1. Touching the DSP touch switch brings up the acoustics mode screen as shown.

   - Touch **BACK** after changing settings. The acoustics mode adjustments will be saved and the system will return to the previous operation screen.

**Adjusting, saving DSP (acoustics)**

The factory set DSP (acoustics) level for each mode can be adjusted to preference and saved.

1. Touch ▲ or ▼ at the right of the screen while in the acoustics mode to be adjusted.
   - There are five + and five - adjustment levels available.

2. Touch the switch for the acoustics mode that has been adjusted until a beep is heard.
Resetting DSP (acoustics) levels

Default settings for the currently adjusted and saved DSP (acoustics) level can be reset.

1. Touch OFF until a beep is heard.
   - The acoustic level will be returned to default value (the default value is "0").

When adjusting the level for the currently selected DSP (acoustics) mode, the level will not be saved for other acoustics modes.
Adjusting sound quality

Adjusting EQ (equalizer)

Adjusts sound quality to preferred characteristics according to the music genre and audio source.

Adjusting/saving EQ

The sound quality can be adjusted according to music genre and then stored. This product has a 7-band parametric equalizer which can adjust median frequency, frequency level, and Q curve (bandwidth).

1 Touch the frequency of each band to select the frequency (median frequency) you want to adjust.
   - Each time the switch of each band is touched, the median frequency will be switched in the order shown below.

<table>
<thead>
<tr>
<th>Band</th>
<th>Median frequency (Hz)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>63 → 80 → 100</td>
</tr>
<tr>
<td>2</td>
<td>125 → 160 → 200</td>
</tr>
<tr>
<td>3</td>
<td>250 → 315 → 400 → 500</td>
</tr>
<tr>
<td>4</td>
<td>630 → 800 → 1k → 1.25k</td>
</tr>
<tr>
<td>5</td>
<td>1.6k → 2k → 2.5k → 3.15k</td>
</tr>
<tr>
<td>6</td>
<td>4k → 5k → 6.3k → 8k</td>
</tr>
<tr>
<td>7</td>
<td>10k → 12.5k → 16k</td>
</tr>
</tbody>
</table>

2 Touch the desired frequency level.
   - To make fine adjustments, touch ▲ or ▼
3 Touch Q1, Q2, Q3 to select a Q curve.
   - The Q curve patterns set the median frequency bandwidth as follows:

<table>
<thead>
<tr>
<th>Switch</th>
<th>Q curve pattern</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q1</td>
<td>Wide</td>
</tr>
<tr>
<td>Q2</td>
<td>Normal</td>
</tr>
<tr>
<td>Q3</td>
<td>Narrow</td>
</tr>
</tbody>
</table>

4 Repeat steps 1 through 3 to change the setting for each band.
   - It is not possible to set more than one band in the same channel to the same median frequency.

5 Touch the switch you want to use to save (EQ1 to EQ5) until you hear a beep.
   - Save the PEQ settings for future use.
   - Touch BACK after changing settings. The PEQ mode adjustment will be saved and the system will return to the previous operation screen.

**ATTENTION**

- If you touch and hold ▲ or ▼ during fine adjustment, the frequency level will continue to adjust automatically until it reaches the center value (0). Touch ▲ or ▼ again to continue adjustment.
- Touch FLAT to return to the center value (0).
Adjusting sound quality

Selecting a EQ pattern from memory

1 Touch a switch from EQ1 to EQ5.
   - The preset pattern stored in memory will be retrieved.
   - Touch BACK after changing settings. The PEQ mode adjustments will be saved and the system will return to the previous operation screen.

Resetting EQ curves

The currently saved equalizer can be returned to the default values.

1 Touch FLAT until you hear a beep.
   - The equalizer curve will be reset to the default values.
Setting POS (position selector)

The stereophonic position for obtaining optimum acoustic effects can be adjusted to match
the number and position of passengers.
In addition, front-to-back, right-to-left volume balance can be adjusted for the selected
position.

1 Touching the image of a seat
shown on the POS setting screen
will change the position.

- The selected position will change its
color to orange. Touching the seat
again will cancel the selection. The
four positions shown by the table
below can be set.

- Touching OFF will cancel all
settings.

- Touching BACK after changing settings. The position will be saved and the system
will return to the previous operation screen.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

- This setting cannot be done at the same time as adjustment of the volume
balance (see next page) and the Circle Surround II (page 43).
- The default settings of the main unit are configured for left-hand drive vehicles.
Adjusting sound quality

Adjusting volume balance

The set position for front-to-back, right-to-left volume balance can be adjusted.

1 Touch **FADER BALANCE** on the POSITION setting screen to display the volume balance adjustment screen.

2 Touch the screen at the preferred balance point.
   
   - To make fine adjustments, touch ▲, ▼, ◀, ►.
   - Touching **CENTER** will set the volume balance to the center position.
   - Touch **BACK** after changing settings.

   The set volume balance will be saved and the system will return to the previous operation screen.

   - To set the POS again, touch **POS**.

**ATTENTION**

- This setting cannot be done at the same time as POS (position selector) adjustment, described on the previous page.
- Touching and holding ▲, ▼, ◀, ► while making fine adjustments will adjust values in a continuous action. However, adjustment will lock when it reaches the center value, and ◀, ►, ▲ or ▼ must be pressed again to continue adjustment.
### Setting the BEEP tone

The guide tone that is heard when touching a panel switch or touch switch can be set.

1. Press **MENU**.
2. Touch **INFO** on the MAIN MENU screen.
3. Touch **SETTING** on the INFORMATION screen.
4. Touch 1, 2, 3, 4 or **OFF** of GUIDE TONE.
   - The pressed touch switch will become brighter.
   - Touching **OFF** will cancel (turn off) the guide tone.
5. Touch **ENTER**.

### Muting sound

Sound from the audio system can be temporarily muted.

1. Press **MUTE**.
   - Volume will become zero.
   - Pressing **MUTE** switch again will return to previous volume.
   - The VOLUME display will flash during mute.

---

**ATTENTION**

The MUTE function will be canceled on pressing the **+** VOLUME switch (it is unaffected by pressing the **-** switch).
Adjusting sound quality

Swiching the bass enhancement (Tru Bass)

You can switch the bass enhancement.

- Note that Tru Bass is adjusted only when the Circle Surround II (page 43) effectiveness is set to Low or Hi.

1 Press MENU.

2 Touch INFO on the MAIN MENU screen.

3 Touch SETTING on the INFORMATION screen.

4 Touch NEXT.

5 Touch ON or OFF of Tru Bass.

6 Touch ENTER.

Setting LOUDNESS

Audio can be modulated to correct for insufficient low and high sounds when listening at low volume.

1 Press MENU.

2 Touch INFO on the MAIN MENU screen.

3 Touch SETTING on the INFORMATION screen.

4 Touch NEXT.

5 Touch ON or OFF of LOUDNESS.
   - The pressed touch switch will become brighter.

6 Touch ENTER.
Setting the sub-woofer

When a sub-woofer is connected, the preferred output level for the audio can be set.

1. Press **MENU**.
2. Touch **INFO** on the MAIN MENU screen.
3. Touch **SETTING** on the INFORMATION screen.
4. Touch **NEXT**.
5. Touch **WOOFER** in the setting screen.

**Setting WOOFER OUTPUT**

The sub-woofer output can be set to STEREO or MONO. Select the method that matches the output method for the connected sub-woofer system.

1. Touch **STEREO** or **MONO** for WOOFER OUTPUT.
   - Touch **BACK** after changing settings.
     The woofer output setting will be saved and the system will return to the previous screen.
Adjusting sound quality

Selecting phase control

The merging of sound between the front and rear speakers and the sub-woofer can be improved by selecting the phase.

Switch to a phase which lets the speakers combine without any disharmony.

1 Touch **NORMA L** or **REVERSE** for PHASE CONTROL.

- Touch **BACK** after changing settings.
  The phase control will be saved and the system will return to the previous screen.

Selecting the sub-woofer level

The output level of the sub-woofer can be adjusted with this function.

1 Touch **▲** or **▼** for WOOFER LEVEL.

- **▲**: Increase level
- **▼**: Decrease level

- Touch **BACK** after changing settings.
  The woofer level will be saved and the system will return to the previous screen.
The frequencies for the front and rear speaker high-pass filter (HPF) and sub-woofer low-pass filter (LPF) can be set within a range of 63 / 80 / 100 / 125 / 160 / 200 Hz. (This is the same as setting the HPF and LPF cutoff frequencies.)

1. Touch ▼ or ▶ to select the cut off frequency.

2. Touch 6dB/oct, 12dB/oct or PASS to select the slope.
   - Touch BACK after changing settings.
   The crossover setting will be saved and the system will return to the previous screen.

If no sub-woofer has been connected, set the slope adjustment to “PASS”. (If slope is set to a setting other than PASS, the low frequency range will not be output from the speakers.)
Adjusting sound quality

Setting the harmonizer

It is possible to set the sound quality boost level to automatically regenerate harmonics such as reverberation, depth, and tone lost in compression, producing a much clearer sound.

1. Press \textbf{MENU}.
2. Touch \textbf{INFO} on the MAIN MENU screen.
3. Touch \textbf{SETTING} on the INFORMATION screen.
4. Touch \textbf{NEXT}.
5. Touch \textbf{LOW}, \textbf{HI} or \textbf{OFF} for HARMONIZER.
   - \textbf{LOW}: Low level of correction
   - \textbf{HI}: High level of correction
   - \textbf{OFF}: No correction (default)
6. Touch \textbf{ENTER}.
   - Selection can be made when MP3/WMA disc is inserted into the unit.
Setting the Circle Surround II

The Circle Surround II reproduces deep bass and localization of sound without a center speaker and/or a sub-woofer. This is also applied to the audio of FM radio and TV. However, it is not effective for the AM radio.

1 Touch **OFF**, **LOW** or **HI** on the operation screen.

- Touch **SET** (in TV and VTR mode) or touch **NEXT** and then **SET** (in DVD mode) to display the touch switches for adjusting sound quality.
- Each time touch switch is touched, the screen display will be changed in the order shown below.

```
OFF → LOW → HI
```

- **LOW**: The effectiveness to reproduce the deep bass sound and the localization of sound is low.
- **HI**: The effectiveness to reproduce the deep bass sound and the localization of sound is high.
- **OFF**: Cancels the function (default).

- The Circle Surround II setting cannot be done at the same time as DSP (Page 30), POS (the position selector) adjustment (Page 35) and LOUDNESS adjustment (Page 38).
- Circle Surround II, SRS and (●) symbol are trademarks of SRS Labs, Inc.
- Circle Surround II technology is incorporated under license from SRS Labs, Inc.
Basic operation

Setting the background screen

The background for the audio screen, information screen and navigation screen can be changed to a preferred wallpaper.

Setting the wallpaper

Changing the wallpaper

1 Press \text{MENU}.

2 Touch \text{INFO} on the MAIN MENU screen.

3 Touch \text{SETTING} on the INFORMATION screen.

4 Touch 1, 2, 3, 4 or 5 of WALL PAPER.
   \begin{itemize}
   \item The pressed touch switch will become brighter and the wallpaper (background) will change.
   \end{itemize}

5 Touch \text{ENTER}.
Adjusting the background screen

Setting the opening screen
The image displayed on the opening screen (which is displayed when the power is turned on) can be changed to your favorite one stored in a CD-R/RW.

Changing the image on the opening screen

1. Insert a CD-R/RW disc that includes your favorite image.
   - It would take approximately 30 seconds to read the image data. While the image data is being read, do not operate the main unit and the ignition key.

2. Touch **Opening Image Change**.

3. Touch the image you want to display on the opening screen.

4. Touch **OK**.
   - Be sure to eject the CD-R/RW disc that includes the image data.

About usable image data
The format of disc and image data that can be used on the opening screen are shown in the table below. If your disc and/or data does not meet the conditions below, the file names may not be listed nor displayed correctly.

<table>
<thead>
<tr>
<th>CD-R/RW</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Disc format</td>
<td>ISO9660 (MODE1)</td>
</tr>
<tr>
<td>File size</td>
<td>Smaller than 100 KB</td>
</tr>
<tr>
<td>File name</td>
<td>ISO9660 LEVEL 2 (Up to 31 bytes)</td>
</tr>
<tr>
<td>File extension</td>
<td>.jpg (Non-JPEG2000-compliant)</td>
</tr>
<tr>
<td>Writing method</td>
<td>Single-session only</td>
</tr>
<tr>
<td>Image size</td>
<td>416 (W) X 240 (H) dots (Max.)</td>
</tr>
</tbody>
</table>

Displayed file
- The files in the root directory (top-most directory) only.
  - CSM .txt*
  - 1 .jpg
  - 2 .jpg
  - ...

*When storing the image data in a CD-R/RW disc, make a text file named "CSM.txt" (any content/text is OK) and store it together with the image data.
- If the image size is larger than the condition above, the image cannot be previewed or imported.
- If the image size is smaller than the condition above, the image will be displayed at the center of screen.
- Only one image data can be imported at a time.
Basic operation

**Adjusting/setting the screen**

Quality adjustments can be made for the images such as the audio operation screen, navigation screen and DVD or VTR (optional).

### Displaying the image adjustment screen

Contrast, brightness and other picture settings can be adjusted to match preferences for viewing DVD video or the audio operation screen.

To make viewing easier, the display switches between day screen/night screen according to whether the vehicle lights (parking lights, taillights, license plate lights) are on/off.

**[Audio operation screen]**

<table>
<thead>
<tr>
<th>Day display [Vehicle lights are off]</th>
<th>Night display [Vehicle lights are on]</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Day display" /></td>
<td><img src="image2" alt="Night display" /></td>
</tr>
</tbody>
</table>

**[DVD/VTR Screen]**

<table>
<thead>
<tr>
<th>Day display [Vehicle lights are off]</th>
<th>Night display [Vehicle lights are on]</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image3" alt="Day display" /></td>
<td><img src="image4" alt="Night display" /></td>
</tr>
</tbody>
</table>

(Default settings)

- When vehicle head lights are on: [Night screen is displayed]
- When vehicle head lights are off: [Day screen is displayed]
1 Press and hold **MENU** until a beep is heard on the audio mode screen or DVD/VTR/TV screen.

2 Touch **ENTER** after making any adjustments.
   - If no adjustments are made after 20 or more seconds, the image quality adjustment screen will be canceled.

   ![Diagrams](image1)
   - When adjusting audio operation screen
   - When adjusting DVD/VTR/TV screen

---

**How to switch to daytime display when the lights are ON**

1 The day screen and night screen will be switched each time **DAY** is pressed.

   ![Diagrams](image2)
   - When adjusting audio operation screen
   - When adjusting DVD/VTR/TV screen

---

**Turning off the screen**

1 Touch **OFF**.
   - Press **AV** or **MAP** to return to the original screen.
Adjusting/setting the screen

Adjusting image quality

The day screen and night screen can be separately adjusted (on the audio operation screen, the navigation screen, and the DVD/VTR/TV screen).

- CONTRAST
  1 Touch  to enhance contrast,  to weaken contrast.

- BRIGHT
  1 Touch  to make lighter,  to make darker.

- COLOR (for DVD/VTR/TV screen only)
  1 Touch  to enhance green color,  to enhance red color.

- TINT (for DVD/VTR/TV screen only)
  1 Touch  to make tint darker,  to make tint lighter.

Switching screen mode

1 Touch WIDE on DVD, VTR or TV operation screen.

2 Touch NORMAL, WIDE1, WIDE2 or WIDE3.
   - This selects the wide mode.
3 Touch **BACK**.

- Returns to the DVD, VTR or TV operation screen.

- **NORMAL mode**

The screen is shown with vertical to horizontal ratio of 3 to 4 (normal TV screen size) and side edges are black.

- **WIDE 1 mode**

The screen for vertical to horizontal ratio of 3 to 4 (normal TV screen size) is uniformly expanded in the left and right directions.

- **WIDE 2 mode**

The screen for vertical to horizontal ratio of 3 to 4 (normal TV screen size) is uniformly expanded in the left and right directions (except for the central section of the screen).

- **WIDE 3 mode**

The screen for vertical to horizontal ratio of 3 to 4 (normal TV screen size) is uniformly expanded in the upward, downward, left and right directions.

---

Viewing of wide screen modes is permitted when limited to the personal entertainment of the user, but caution is required when using technologies such as image compression and expansion for the purpose of commercial benefit or public presentation may infringe upon the rights of the copyright holder being protected by applicable copyright law.
How to use the AM / FM radio

Listening to the AM/FM radio

1. Press **MENU**.
2. Touch **SOURCE**.
3. Touch **AM** to receive AM radio, or **FM** to receive FM radio.

When an HD Radio tuner is connected, the standard radio (analog radio) is also controlled through the HD Radio tuner. Note that this means the antenna should be connected to the HD Radio tuner.
Selecting radio stations

Manual selection

1. Press ▶ or ◀.
   - Each pressing of the switch moves the frequency one step up or down. (One step on the AM band is 10kHz. One step on the FM band is 0.2MHz.)
     ▶ : Raises frequency
     ◀ : Lowers frequency

Automatic selection

1. Press and hold ▶ or ◀ until a beep is heard.
   - The station that is closest in frequency to the frequency that is currently displayed on the screen will be searched for automatically, and searching will stop when the station is received. To stop the search before a station is found, press the button again.

Selection using preset switches

1. Touch the preset switch that already has a station recorded.
   - Refer to "Saving radio stations" on page 53 for details on saving stations.

If the reception for a particular station is weak in the area you are in, automatic selection may not work.
How to use the AM / FM radio

Selecting radio bands

1 Touch **FUNC**.

2 Touch **BAND**.
   - Each time the switch is touched, the radio band will be changed in the order shown below.

   ![Radio band selection diagram]

   - FM1 → FM2 → FM3
Saving radio stations

There are two modes for saving radio stations, manual and AUTO.P, and these modes operate independently.

**Saving manually**

Confirm that "AUTO.P" is not displayed in the upper part of the screen.

- If "AUTO.P" is displayed, touching AUTO.P will switch the screen to manual.

1. Use manual tuning or automatic tuning to select the station to be saved.

2. Choose a preset switch and touch it until a beep is heard.
   - The radio station (frequency) is set. Touching the preset switch will now tune in the selected station.

**Saving with AUTO.P**

1. Touch FUNC.

2. Touch AUTO.P until a beep is heard.
   - The AUTO.P function will be activated and start automatically selecting stations. A beep will be heard when automatic selection of stations is completed. On touching AUTO.P again, the display will switch to the previously recorded station.

**Changing stations saved by AUTO.P**

1. Use manual tuning or automatic tuning to select the station to be saved.

2. Choose a preset switch and touch it until a beep is heard.
How to use the AM / FM radio

About AUTO.P

Because AUTO.P temporarily saves stations for the preset switches, stations saved manually will remain in memory even if AUTO.P is used. By manually saving stations that are used regularly, these manually saved stations can be restored even after AUTO.P has been used, such as after traveling.

Touching AUTO.P while AUTO.P is being used or after AUTO.P has been used will return the preset memories back to the condition they had before AUTO.P was used. (Doing so will delete the stations saved with AUTO.P.) The flow for switching from AUTO.P to manual is shown below.

If the BAND is switched to another BAND, the saved station with AUTO.P is cleared.

- AUTO.P may not automatically receive stations if radio waves in the surrounding area are weak.
- A station saved by the tuning switch may not match a station saved by AUTO.P even though the signal is received from the same station.
- Due to conditions for receiving radio waves, saved stations may differ even when the AUTO.P switch is operated repeatedly in the same location.
- Up to six stations having good reception sensitivity are automatically saved in order starting from the lowest frequency.
- When less than six stations capable of reception are found, nothing is saved for the remaining preset switches.
- In the FM mode, when the BAND is switched to another BAND, the AUTO.P is canceled temporarily.
Turning off the radio

1. Press **MENU**.
2. Touch **AUDIO OFF**.

   - Touching **AUDIO OFF** again on the MAIN MENU screen will turn on the radio and resume reception of the radio station (frequency) received before power was turned off.
How to use HD Radio

When an optional HD Radio tuner is connected, HD Radio broadcasts can be received.

Listening to HD Radio

Depending on the reception status, HD Radio can also receive analog broadcasts, which means reception is still possible in regions with no digital coverage.

1. Press **MENU**.
2. Touch **SOURCE**.
3. Touch **AM** to receive AM radio, or **FM** to receive FM radio.
   - When an HD Radio tuner is connected and a digital broadcasting program is received, "DIGITAL" is displayed.
   - When an HD Radio tuner is connected, the **TITLE** touch switch becomes available.

**ATTENTION**

- With the **MODE** switch, you can switch between analog and digital broadcasting.
- The HD Radio Ready logo is a proprietary trademark of iBiquity Digital Corp.
Selecting radio stations

Manual selection

1. Press ▶ or ◀.
   - Each pressing of the switch moves the frequency one step up or down. (One step on the AM band is 10kHz. One step on the FM band is 0.2MHz.
   
   ▶ : Raises frequency
   ◀ : Lowers frequency

Automatic selection

1. Press and hold ▶ or ◀ until a beep is heard.
   - The station that is closest in frequency to the frequency that is currently displayed on the screen will be searched for automatically, and searching will stop when the station is received. To stop the search before a station is found, press the button again.

Selection using preset switches

1. Touch the preset switch that already has a station recorded.
   - Refer to “Saving radio stations” on page 58 for details on saving stations.

If the reception for a particular station is weak in the area you are in, automatic selection may not work.
How to use HD Radio

Saving radio stations
There are two modes for saving radio stations, manual and AUTO.P, and these modes operate independently.

Saving manually
Refer to "How to use the AM / FM radio" on page 53.

Saving with AUTO.P

1 Touch **FUNC**.

2 Touch **AUTO.P** until a beep is heard.

- The AUTO.P function will be activated and start automatically selecting stations. A beep will be heard when automatic selection of stations is completed.
- When a radio station found by AUTO.P function is stored into the preset switch, the station already stored in the preset switch will be overwritten.

Changing stations saved by AUTO.P
Refer to "How to use the AM / FM radio" on page 53.

Displaying information about the current broadcast
When receiving an HD Radio broadcast, information about the current broadcast, such as the name of the radio station, the album, the title of the track, the artist, and the musical genre, can be displayed if that station is broadcasting those information.

1 Touch **FUNC**.

2 Touch **TITLE**.

- Touch **TITLE OFF** to return to the operation screen.
Turning off the radio

1 Press MENU.

2 Touch AUDIO OFF.

- Touching AUDIO OFF again on the MAIN MENU screen will turn on the radio and resume reception of the radio station (frequency) received before power was turned off.
How to use the SIRIUS satellite radio

When an optional SIRIUS satellite radio tuner is connected, SIRIUS satellite radio broadcasts can be received.

Listening to SIRIUS satellite radio

With SIRIUS satellite radio, over 100 channels are available including music, news, and entertainment programs.

You can select the channel you want from various categories such as POP and ROCK, or you can select a channel by direct input.

Reception of SIRIUS satellite radio is a paid subscription.

1. Press **MENU**.
2. Touch **SOURCE**.
3. Touch **SIRIUS**.

Check the SIRIUS ID

The SIRIUS ID number is a 12-digit numerical code that is assigned each time the SIRIUS satellite radio tuner is connected.

1. Touch **SIRIUS ID** on the INFORMATION screen.
   - A 12-digit numerical code is displayed.
### Changing the SIRIUS band

1. Touch **FUNC**.
2. Touch **BAND**.
   - The BAND changes.
   - [SIRIUS 1] → [SIRIUS 2] → [SIRIUS 3] → [SIRIUS 4] ... → return to [SIRIUS 1]

### Selecting the channel you want to listen to

#### Selecting from the available categories

1. Touch **FUNC**.
2. Touch **CATEGORY**.
3. Select the category that you want.
   - Touch ▲ or ▼ to switch categories.

If the selected category is unobtainable, the blank category button appears.

#### Selecting a channel by direct input

1. Touch **FUNC**.
2. Touch **DIRECT**.
3. Input a channel.
4. Touch **ENTER**.
How to use the SIRIUS satellite radio

Displaying information about the current broadcast
During SIRIUS broadcasts, information including the channel name, the album name, the title, and the artist can be displayed for the current track.

1. Touch **FUNC**.
2. Touch **TITLE**.
   - Touch **TITLE OFF** to return to the operation screen.

Turning off the SIRIUS

1. Press **MENU**.
2. Touch **AUDIO OFF**.
How to use the XM satellite radio

When an optional XM satellite radio tuner is connected, XM satellite radio broadcasts can be received.

Listening to XM satellite radio

With XM satellite radio, over 100 channels are available including music, news, and entertainment programs.

You can select the channel you want from various categories such as DANCE and ROCK, or you can select a channel by direct input.

Reception of XM satellite radio is a paid subscription.

1 Press **MENU**.
2 Touch **SOURCE**.
3 Touch **XM**.

Check the XM ID

The XM ID number is a 8-digit numerical code that is assigned each time the XM satellite radio tuner is connected.

1 Touch **XM ID** on the INFORMATION screen.
   • A 8-digit numerical code is displayed.
Changing the XM band

1 Touch **FUNC**.

2 Touch **BAND**.
   - The BAND changes.
     [XM 1] → [XM 2] → [XM 3] → [XM 4] ... → return to [XM 1]

Selecting the channel you want to listen to

**Selecting from the available categories**

1 Touch **FUNC**.

2 Touch **CATEGORY**.

3 Select the category that you want.
   - Touch ▲ or ▼ to switch categories.

If the selected category is unobtainable, the blank category button appears.

**Selecting a channel by direct input**

1 Touch **FUNC**.

2 Touch **DIRECT**.

3 Input a channel.

4 Touch **ENTER**.
How to use the XM satellite radio

Displaying information about the current broadcast

During XM broadcasts, information including the channel name, the title, and the artist can be displayed for the current track.

1. Touch **FUNC**.

2. Touch **TITLE**.

   - Touch **TITLE OFF** to return to the operation screen.

Turning off the XM

1. Press **MENU**.

2. Touch **AUDIO OFF**.
How to use the CD player

Listening to a CD

When a CD is inserted into the disc slot, it automatically starts playing.

1 Press **MENU** while a CD is inserted.

2 Touch **SOURCE**.

3 Touch **CD**.
   - Playback will begin.

Selecting a song

You can select a song you want to hear.

1 Press **** or ****.
   - **** : Selects next song
   - **** : Selects previous song

   Restarts current track. Pressing the down button once more continuously plays previous tracks.

**ATTENTION**
- Titles and song names can be displayed when they are recorded on a CD. Up to 32 characters can be shown in the display.
- Only characters recorded by ASCII code can be shown on the CD-TEXT display.
- The CD-TEXT display may not be able to show characters for discs recorded with many title characters.
Fast-forwarding/rewinding

It is possible to fast-forward/rewind the song played currently.

1 Press and hold ➤ or ◀ until a beep is heard.

- ➤ : Fast-forwards
- ◀ : Rewinds
  The main unit switches to the fast-forward (rewind) mode when the beep is heard and will continue fast-forwarding (rewinding) until your finger is removed from the switch.

Searching for a song

1 Touch FUNC.

2 Touch SCAN.

- The main unit will play the first 10 seconds of each song. Touching SCAN again will continue playing the current song.

Repeating a song

1 Touch FUNC.

2 Touch RPT.

- Touching RPT once will cause repeating of the song until the function is canceled. Touching RPT again will cancel repeating of the song.
How to use the CD player

Playing songs in random order

1 Touch **FUNC**.

2 Touch **RAND**.

- Touching **RAND** will play songs in random order until the function is canceled.
- Touching **RAND** again will cancel random playing of songs.
- The song to be played next is randomly selected at the end of the current song, so it is possible that a single song could end up being played twice in a row.

Turning off the CD player

1 Press **MENU**.

2 Touch **AUDIO OFF**.

- Touching **AUDIO OFF** again on the MAIN MENU screen will resume playback.
For safety considerations, some functions are disabled while the vehicle is in motion.

The following operating procedures are based on this example of MP3/WMA file structure below.

**Example of MP3/WMA file structure**
Playing MP3/WMA

When a CD is inserted into the disc slot, it automatically starts playing.

1. Press **MENU** while a disc is inserted.
2. Touch **SOURCE**.
3. Touch **MP3 WMA**.

- Playback will begin.
- The CD player screen will be shown for about 2 seconds as the system checks whether the inserted CD is a music CD or MP3/WMA disc.
- Normally, tracks are played back in the order 1 → 2 → 3 → 4 → 5 → 6 → 7.
- When multiple MP3/WMA files and folders are on the same level, they are played in ascending order by folder and file names.

Selecting a music file

A music file located within a folder can be selected.

**Selecting with file change switches**

1. Touch the music file.

- The currently selected file name and folder name will be shown in the display.
- When more than 8 music files are located in the same folder, touching ▲ or ▼ can switch between the data. (This function is not available when the vehicle is in motion.)

**Selecting with TUNE/TRACK button**

When several music files are located in the same folder, the next music file or previous music file can be selected with the track selection (track start point).

1. Press ▶ or ◀.

   - ▶: Selects next music file
   - ◀: Selects previous music file

   Restarts current track. Pressing the down button once more continuously plays previous tracks.

If music data (CD-DA) and MP3/WMA data are mixed on the same disc, only the data recorded in the first session can be played.
How to use the MP3/WMA player

Fast-forwarding/rewinding

It is possible to fast-forward/rewind the song being played.

1 Press and hold ➤ or ◄ until a beep is heard.
   - ➤: Fast-forwards
   - ◄: Rewinds
     The main unit switches to the fast-forward (rewind) mode when the beep is heard and will continue fast-forwarding (rewinding) until your finger is removed from the switch.

Changing display of the current level

The folder level can be switched and displayed.

1 Touch➤.
   - ➤: Displays the next higher folder level.

Displaying the current level

Displays the file currently being played.

1 Touch HOME.
   - HOME: Displays the level of the file currently being played.

Searching for a music file

1 Touch FUNC.

2 Touch SCAN.
   - The system will play the first 10 seconds of each song located within the same layer of the folder currently being played. Touching SCAN again will continue playing the current song.
Repeating the same music file

1. Touch **FUNC**.
2. Touch **RPT**.
   - The file currently being played will be repeated.
   - Setting RPT will cause repeating of the song until the function is canceled. Touching **RPT** again will cancel repeating of the song.

Playing songs in random order

1. Touch **FUNC**.
2. Touch **RAND**.
   - Files will be randomly selected from among all files at the same level as the folder currently being played.
   - **RAND** will play songs in random order until the function is canceled. Pressing **RAND** again will cancel random playing of songs.
   - Touching **RPT** while the random function is operating will repeat the currently playing song. Touching **RPT** again will return to random playing of songs.
   - The song to be played next is randomly selected at the end of current song, so it is possible that a single song could end up being played twice in a row.
How to use the MP3/WMA player

About display of file information

Folder names and file information (album name and song titles) recorded on the disc can be displayed.

Displaying folder/file names

1 Press AV to display the operation screen.

Displaying file information

1 Touch TITLE.

- The TITLE switch will change to TITLE OFF while file information is being displayed. Touching TITLE OFF will change the display to a folder/file switch.

Turning off the MP3/WMA player

1 Press MENU.

2 Touch AUDIO OFF.

- Touching AUDIO OFF again on the MAIN MENU screen will resume playback.
About MP3/WMA

MP3 (MPEG-1 Audio Layer III) is a standard format for audio compression technology. By using MP3, a file can be compressed to one-tenth the size of the original.

WMA (Windows Media™ Audio) is the audio compression format by Microsoft. This can compress files to a smaller size than MP3 can.

This unit has limitations on MP3/WMA file standards and recorded media and formats that can be used. Be aware of the following points when recording MP3/WMA files.

**Supported standards**
- MPEG-1 Audio Layer III

**Supported sampling frequencies**
- 16, 22.05, 24, 32, 44.1, 48 (kHz)

**Supported bit rate**
- 8 to 320 (kbps)
  - * Supports VBR.
  - * Does not support free format.
  - * Bit rates vary for MPEG-1 and MPEG-2.

**Supported channel modes**
- stereo, monaural, dual channel, joint stereo

**Playable MP3 file standards**

- Supported standards : MPEG-1 Audio Layer III
- Supported sampling frequencies : 16, 22.05, 24, 32, 44.1, 48 (kHz)
- Supported bit rate : 8 to 320 (kbps)
  - * Supports VBR.
  - * Does not support free format.
  - * Bit rates vary for MPEG-1 and MPEG-2.
- Supported channel modes : stereo, monaural, dual channel, joint stereo
How to use the MP3/WMA player

**Playable WMA file standards**

- Supported standard: WMA Ver. 7, 8, 9
- Supported sampling frequencies: 44.1, 48 (kHz)
- Supported bitrates: 48 to 192 (kbps)
  - * VBR is supported (48 to 192 kbps)
  - * No support for reversible compression (loss-less compression)

Playable sampling frequencies and supported bitrates

**ID3tag/WMA Tag**

MP3 and WMA files have an "ID3tag/WMA tag" that allows input of text information so that data such as song title and artist can be saved.

This unit supports ID3v.1.0 and ID3v.1.1 tags. Use only ASCII code to record tags, since only ASCII code is supported by this equipment. Recording of characters not included in ASCII code will result in display of garbled characters.

This unit supports the WMA tag (v1.20.02). Since the WMA tag supports unicode only, please input the information with unicode characters.

**Media**

Media capable of playing MP3/WMA includes CD-ROM, CD-R and CD-RW discs.

Compared to CD-ROM media commonly used for music discs, CD-R and CD-RW discs are fragile in high temperature/high humidity environments and one section of the CD-R/CD-RW may become incapable of playback. Fingerprints or scratches on the disc may prevent playback or cause skipping during playback.

Sections of CD-R/CD-RW may deteriorate if left inside a vehicle for long periods of time.

It is also recommended that CD-R/CD-RW discs be kept in a light-blocking case because the discs are vulnerable to ultra-violet light.
How to use the MP3/WMA player

Format of discs

The format of discs to be used must be as following:

- Disc format: CD-ROM (MODE 1), CD-ROM XA (MODE2 Form1)
- File format: ISO9660 Level 1 or Level 2 ROMEO system, JOLIET system

MP3/WMA files recorded in a format other than the one explained above may result in files that cannot be played normally and in file names and folder names that do not display properly.

Limitations in addition to standards are as follows.

- Maximum directory layers: 8 layers
- Maximum characters for folder names/file names:
  - 30 characters for MP3 (including delimiter *. + file extension 3 characters)
  - 15 characters for WMA (including delimiter *. + file extension 3 characters)
- Allowable characters for folder names/file names: A to Z, 0 to 9, _ (underscore)
- Number of files possible on a single disc: 512
- Number of folders possible on a single disc: 255
Configuration example for CD supporting MP3/WMA

A total of 255 folders can be recorded on a single disc.

A total of 512 files can be created within a single disc.

- A total of 255 folders can be recorded on a single disc.
How to use the MP3/WMA player

**File names**

Only files with the MP3/WMA file extension ".mp3/.wma" can be recognized as MP3/WMA and played. Be sure to save MP3/WMA files with the ".mp3/.wma" file extension. Use half-width English capital letters to write "MP3" or "WMA" of the extension.

**Multi-sessions**

Multisessions are supported and CD-R/RW with recorded MP3/WMA files can be played. When written with "Track at once", however, finalize the disc with session close or write protect.

**Playing MP3/WMA**

When a disc having MP3/WMA files recorded on it is inserted into the main unit, the system first checks all the files on the disc. If the number of files and folders is large, the check will take some time.

While the system is checking the disc, the music that had been playing continues to play.

In order to speed up completion of the file check, it is recommended that you avoid recording files that are not MP3/WMA files and avoid establishing unnecessary folders.

In addition, it is recommended that you record all data in a single session because a multisession disc takes time for CD control information acquisition.

**MP3/WMA playing time display**

It is possible that playing time will not be correct, depending on the writing condition of the MP3/WMA file.

* It is possible that playing time will not be correct when VBR Fast Up/Down is operated.

**Display order of MP3/WMA file/folder names**

Names of MP3/WMA folders and files within the same level are displayed in the following order.

1. MP3/WMA files displayed first, by ascending order of numbers, letters.
2. Folders displayed next, by ascending order of numbers, letters.

If the ".mp3/.wma" file extension is attached to a file other than an MP3/WMA file, that file will be mistakenly recognized by the main unit as an MP3/WMA file and played, resulting in loud noise output that can damage the speakers. Be sure to avoid attaching the ".mp3/.wma" file extension to files that are not MP3/WMA files.
Making and playing MP3/WMA files

MP3/WMA files created by recording broadcasts, records, audio recordings, video recordings or live performances cannot be used for purposes other than personal entertainment without permission of the copyright holder as set forth in copyright law.

**Downloading from Internet MP3/WMA music sites**

There are many kinds of sites that distribute MP3/WMA files on the Internet, such as "pay per download" online shopping sites, "try before you buy" listening sites and free download sites. Follow the rules for each site (such as paying fees) and download according to site instructions.

**Converting CD music to MP3/WMA files**

Prepare a computer with commercially available MP3/WMA encoding software (conversion software). Some encoding programs available on the Internet do not require payment. Music data files in MP3/WMA format can be made by inserting the music CD into the CD-ROM drive of the computer and following the procedures of the MP3/WMA encoding software to compress the songs of the music CD. A 12cm music CD (having a maximum of 74 minutes of recording/650MB of data) can be compressed to 65MB (about 1/10 of the original size).

**Writing to CD-R/CD-RW**

MP3/WMA files can be recorded on CD-R/RW by using a CD-R/RW drive connected to a computer. Record by setting the recording format of the recording software to ISO9660 level 1 or level 2 (not including extension format).

Select CD-ROM ( mode1 ) or CD-ROM XA ( mode2 ) for the disc format.

**When playing back CD-R/RW**

Insert a CD-R/RW disc having recorded MP3/WMA files. The system will automatically determine whether the disc is a music CD or a CD-R/RW with MP3/WMA files and begin playing the disc. A music CD recorded onto a CD-R/RW can also be played. However, depending on the type of disc being used, the disc may not play.

• A fixed bit rate of 128kbps and sampling frequency of 44.1kHz is recommended for obtaining stable audio quality at playback.
• Depending on the characteristics of a disc, CD-R and CD-RW may not be able to read the disc.
• Because there are many types of MP3/WMA encoding software available, including commercial and freeware programs, audio quality may deteriorate, noise may be generated when playing starts and some recordings may not play, depending on the condition of the encoder and the file format.
• When files other than MP3/WMA files are recorded on a disc, the system may take some time to recognize the disc and it may not play the disc.
How to use the CD changer

An optional CD changer can be connected and used.

Listening to a CD

1. Press \textbf{MENU}.
2. Touch \textbf{SOURCE}.
3. When only one CD changer is connected, touch \textbf{CDCHANGER1}. When two CD changers are connected, touch \textbf{CDCHANGER1} or \textbf{CDCHANGER2}.

Selecting a song

Refer to "How to use the CD player" (Page 68).

Fast-forwarding/rewinding

Refer to "How to use the CD player" (Page 69).
Selecting a CD

A CD can be selected from among all the discs on a changer.

1. Touch one of the disc changing switches.
   - The number for the selected CD will change color.

Searching for a song or CD from all CDs in changer

**Searching for a song**

Refer to "How to use the CD player" (Page 69).

**Searching for a CD**

1. Touch **FUNC**.
2. Touch **DISC SCAN**.
   - The system will play the first 10 seconds of the first song on each CD in the changer. Touching **DISC SCAN** again will continue playing the current song.

**ATTENTION**

- The system will display the amount of disc changing switches that matches the number of CDs that can be inserted into the CD changer, and it will only allow selection of disc numbers that have discs currently loaded.
- No operation is possible when there are no discs loaded into the CD changer.
- If two CD changers are connected, switch between the optional CD changers and the CD changer with **CDCHANGER1** / **CDCHANGER2**.
How to use the CD changer

Repeating a song or CD

Repeating the current song

Refer to "How to use the CD player" (Page 69).

Repeating the current CD

1 Touch **FUNC**.

2 Touch **DISC RPT**.

- Touching **DISC RPT** once will cause repeating of the CD until the function is canceled.
- Touching **DISC RPT** again will cancel repeating of the CD.

Playing songs in random order

Playing songs on current CD in random order

Refer to "How to use the CD player" (Page 70).

Playing songs on all CDs in random order

1 Touch **FUNC**.

2 Touch **DISC RAND**.

- Touching **DISC RAND** will play songs in random order until the function is canceled.
- Touching **DISC RAND** again will cancel random playing of songs.
- The song to be played next is randomly selected at the end of current song, so it is possible that a single song could end up being played twice in a row.

Turning off the CD player

1 Press **MENU**.

2 Touch **AUDIO OFF**.

- Touching **AUDIO OFF** again on the MAIN MENU screen will resume playback.
Operating the iPod

When an optional iPod interface adaptor (iPC-106) is connected, it is possible to operate the iPod® with this main unit.

- iPod is for legal or rightholder-authorized copying only. Don't steal music.
- iPod is a trademark of Apple Inc., registered in the U.S. and other countries.

Listening to iPod

1. Press **MENU**.
2. Touch **SOURCE**.
3. Touch **iPod**.
   - Playback will begin
Searching for a song in various ways

You can select a song you want to listen to from ALBUM, ARTIST, PLAYLIST, GENRE or SONG.

Displaying the search mode screen

1 Touch **MENU** repeatedly until the search mode screen (top menu) as shown below is displayed.

2 Touch **PLAYLIST**, **ARTIST**, **ALBUM**, **GENRE** or **SONG** and select the song you want to listen to.

- If no operation was performed on the search mode screen for 10 seconds, it returns to the playback.

About text display

Alphanumeric and symbols can be used for text display. Even if the characters other than alphanumeric and symbols are displayed on your iPod, they are not displayed on this unit.
Operating the iPod

Selecting a song from your favorite GENRE

1 Touch **GENRE** on the search mode screen.
   - All the genre names stored in the iPod that is connected to this unit will be displayed.

2 Touch **GENRE** name you want to browse.
   - The ARTIST names stored in the selected GENRE will be displayed.

3 Touch **ARTIST** name you want to browse.
   - Touching **ARTIST** briefly will display the ALBUM names stored in the selected ARTIST.
   - By touching **ARTIST** for several seconds, the first track in the selected ARTIST will start playing.

4 Touch **ALBUM** name you want to browse.
   - Touching **ALBUM** briefly will display the song names stored in the selected ALBUM.
   - By touching **ALBUM** for several seconds, the first track in the selected ALBUM will start playing.

5 Touch the song name you want to listen to.
   - The selected song will be played.
**Selecting a song from your favorite ARTIST**

1. Touch **ARTIST** on the search mode screen.
   - All the stored ARTIST names will be displayed.

2. Touch ARTIST name you want to browse.
   - Touching it briefly will display the ALBUM names stored in the selected ARTIST.
   - By touching **ARTIST** for several seconds, the first track in the selected ARTIST will start playing.

3. Touch ALBUM name you want to browse.
   - Touching it briefly will display the song names stored in the selected ALBUM.
   - By touching **ALBUM** for several seconds, the first track in the selected ALBUM will start playing.

4. Touch the song name you want to listen to.
   - The selected song will be played.

**Selecting a song from your favorite ALBUM**

1. Touch **ALBUM** on the search mode screen.
   - Touching it briefly will display all the stored ALBUM names.

2. Touch ALBUM name you want to browse.
   - Touching it briefly will display the song names stored in the selected ALBUM.
   - By touching **ALBUM** for several seconds, the first track in the selected ALBUM will start playing.

3. Touch the song name you want to listen to.
   - The selected song will be played.
Operating the iPod

Selecting your favorite song from song name list

1 Touch SONG on the search mode screen.
   • Touching it briefly will display all the stored song names.

2 Touch the song name you want to listen to.
   • The selected song will be played.

Selecting a song from your favorite PLAYLIST

1 Touch PLAYLIST on the search mode screen.
   • Touching it briefly will display all the stored PLAYLIST names.
   • Touching it for several seconds will play all the songs for every PLAYLIST.

2 Touch the PLAYLIST name you want to listen to.
   • The selected PLAYLIST will be played.
   • Touching ALL SONGS will play all the songs for every ALBUM.

About REPEAT/RANDOM function

- REPEAT, RANDOM and ALBUM RANDOM correspond to the "Song REPEAT", "Shuffle" and "ALBUM shuffle" functions of the iPod, respectively.
- Touching FUNC will display the RPT, RAND and ALBUM RAND button.
Selecting a song

You can select a song you want to hear.

1. Press ▶ or ◀.
   - ▶: Selects next song
   - ◀: Selects previous song
     Restarts current track. Pressing the down button once more continuously plays previous tracks.

Fast-forwarding/rewinding

It is possible to fast-forward/rewind the song played currently.

1. Press and hold ▶ or ◀ until a beep is heard.
   - ▶: Fast-forwards
   - ◀: Rewinds
     The main unit switches to the fast-forward (rewind) mode when the beep is heard and will continue fast-forwarding (rewinding) until your finger is removed from the switch.
How to operate the DVD player

**Before using the DVD player**

This equipment can play high quality images and high quality digital sound of DVD videos. It is also possible to switch between different languages recorded on the DVD video (dubbing, subtitles, etc.), and with videos having several angles of the same scene recorded, the preferred angle can be selected and played.

### DVD video characteristics

**About Multiple Languages**

Some DVD discs have dialog recorded in several different languages, and the language can be switched during playback in the same way as multilingual TV broadcasts.

![An airplane was flying in the night sky...](image)

**About Multiple Angles**

Some DVD discs have a single scene recorded from several different angles (multiple angle), and the preferred angle can be switched during playback.

* Depending on the disc, multiple angles may not be viewed.

![The angle of the image is changed.](image)
About Subtitles
Some DVD discs have subtitles recorded in several different languages, and the subtitles can be switched during playback. The video can also be played without any subtitles displayed.

About discs

About playable discs
This equipment conforms to NTSC color television methods, so please use discs that display "NTSC" on the disc or package. This equipment cannot play discs using color television methods other than NTSC (such as PAL, SECAN).

Before using the DVD player

**About region codes of playable discs**

Some DVD discs display a ("Region Code"). The mark (a number) shows the geographical region where the disc can be played. This equipment will not play discs that do not show "1" or "ALL" in this mark. Even if the disc does play, the message "Cannot play this disc" will be displayed on the screen. Note also that some discs may be subject to regional restrictions, meaning that this equipment will not play them, even though they list or state a region code.

<table>
<thead>
<tr>

| ALL  | Shows playable region code.  
| 1    | • ALL indicates worldwide. A number indicates a specific region code. "1" is the region number for North America. |

**About marks displayed on discs**

The following mark may be displayed on a DVD disc or its package.

The playing condition is determined by the intention of the DVD/software creator. Some functions may not perform during operation because this equipment is playing the disc according to content specifications intended by the software creator. Be sure to consult the explanatory material provided with the disc to be played.
Videos and songs recorded on a DVD are divided into many segments. Large segments are called "titles", and each title has a number ("title number"). Title segments are further divided into smaller segments called "chapters", and each chapter has a number ("chapter number").

Products equipped with Macrovision

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.
Before using the DVD player

About flow of operations

The section below describes the flow for items such as operation and search of images and default settings for the DVD player.

- Touching a touch switch brings up the operation screen shown below.

- **DVD operation screen**

- **Title screen**

- **Menu operation screen**

- **Menu number search screen**

- **Default settings screen**
A DVD can be watched only if the vehicle is completely stopped in a safe location with the parking brake set and the ignition switch turned to ON or ACC. (Only sound can be heard if a DVD is played while the car is in motion.)

### Watching a DVD

Start playback by inserting a DVD into the DVD insertion slot, which will automatically turn on power.

1. Press **MENU** while a disc is inserted.
2. Touch **SOURCE**.
3. Touch **DVD**.
   - Playback will begin.
   - If the operation switches (touch switches) are not being displayed, press **AV** or touch the screen.
How to use the DVD player

Operating the video

Playing the video

1 Touch ▶.

Fast-forwarding/rewinding

It is possible to fast-forward or rewind through the video being played.

Using panel button

1 Press and hold ▶ or ◀ until a beep is heard.
   - ▶: Advances the video
   - ◀: Rewinds the video
   - The main unit switches to the fast-forward (rewind) mode when the beep is heard and will continue fast-forwarding (rewinding) until your finger is removed from the switch.

Fast-forwarding/rewinding using the touch switches

1 Touch ◀ or ▶.
   - The main unit switches to the fast-forward (rewind) mode when the beep is heard and will continue fast-forwarding (rewinding) until your finger is removed from the switch.

ATTENTION

- Information for items such as touch switches will be displayed for about 6 seconds. Pressing AV or touching the screen will display them again.
- Depending on the disc, automatic playback may not function or playback may not function unless a menu recorded on the disc is selected. (Refer to "Operating the disc menu" on page 102.)
**Pausing the video**

1. Touch **II**.

   - While paused (II), briefly touching  will play in slow motion and touching  will play frame-by-frame.

**Stopping the video**

1. Touch **■**.
**How to use the DVD player**

### Operating the disc menu

It is possible to use the menu recorded on the disc.

1. Touch \( \rightarrow \) on the DVD operation screen.
2. Touch \( \text{MENU} \) or \( \text{TOP MENU} \).
3. Touch \( \text{ } \)
4. Touch \( \uparrow \downarrow \leftrightarrow \rightarrow \) and select the video to play.
5. Touch \( \text{ENTER} \).

---

**ATTENTION**

 Recorded menu items will differ by disc. Some functions may not perform during operation because playback is following disc content specifications.

### Turning off the DVD

1. Press \( \text{MENU} \).
2. Touch \( \text{AUDIO OFF} \).
   - Touching \( \text{AUDIO OFF} \) again on the MAIN MENU screen will resume playback.
Searching for a desired chapter

It is possible to search for a particular video segment by title and chapter or by menu number (number for divided segments).

**Searching by chapter**

1. Press ▶ or ◀.
   - ▶: Selects next chapter
   - ◀: Selects previous chapter

**Searching by title number**

1. Touch SEARCH on the DVD operation screen.
   - The title number input screen will be displayed.

2. Input the title number by touching ‼, +, -10, +10.
   - Touching ‼ or + changes the title number by ones.
   - Touching -10 or +10 changes the title number by tens.

3. Touch ENTER.
How to use the DVD player

Searching by menu number

1 Touch  on the DVD operation screen.

2 Touch .

3 Touch NUMBER .

- The menu number input screen will be displayed.

4 Input the menu number by touching , , -10 , +10 .

- Touching or changes the menu number by ones.
- Touching or changes the menu number by tens.

5 Touch ENTER on the DVD operation screen.
Changing the touch switch display
Display of the touch switches can be changed or turned off.

Turning off the touch switches

1 Touch **OFF** on the DVD operation screen.
   - Pressing **AV** or the touching the screen will display the touch switches again.

Changing the touch switch display locations

1 Touch **NEXT** on the DVD operation screen.
2 Touch **строен**.
3 Touch **POSITION**.
   - The position of the touch switch will move up or down with each touch of the screen.
How to use the DVD player

Switching between screen display and audio

It is possible to change the language for subtitles, the language for audio and the display angle for the video being played.

Switching the video angle

When several angles of a scene are recorded on a disc, the angle can be switched.

1. Touch \( \text{ANGLE} \) on the DVD operation screen.

2. Touch \( \text{ANGLE} \) when the multi-angle mark is displayed.
   - The angle number will be displayed.

3. Touch \( \text{ANGLE} \).
   - The angle number will change and the angle of the video will be switched.

Each time \( \text{ANGLE} \) is pressed, the angle will change in order from among the angles recorded on the disc.
Switching subtitle languages

When subtitles in several languages are recorded on a disc, the subtitles can be switched.

1 Touch \( \rightarrow \) on the DVD operation screen.

2 Touch \( \text{SUB TITLE} \).
   - The subtitle number and language will be displayed.

3 Touch \( \text{SUB TITLE} \).
   - Switches the subtitle number each time the touch switch is touched and switches the displayed subtitle language.

Each time \( \text{SUB TITLE} \) is pressed, the subtitle language will change in order from among the subtitles recorded on the disc.
- Depending on the disc, it may only be possible to change subtitles from the top menu.
How to use the DVD player

Switching dubbed audio language

When dubbed voices in several languages are recorded on a disc, the voices can be switched.

1 Touch **NEXT** on the DVD operation screen.

2 Touch **AUDIO**.
   - The audio number and language will be displayed.

3 Touch **AUDIO**.
   - The audio number will change and the language of voices being played will be switched.

• Each time **AUDIO** is pressed, the audio language will change in order from among the languages recorded on the disc.

   Language 1 → Language 2 → Language...

• Depending on the disc, it may only be possible to change the language from the top menu.
• The dts (digital theater system) format is not supported by this equipment, so no audio will be emitted when "dts audio" is selected by a disc having dts audio recorded on it. In this case, select "Dolby Digital audio" if it is definitely recorded on the DVD video.
• dts is a registered trademark of the US company Digital Theater Systems, Inc.
**Setting the DVD player**

The language preference for voices, subtitles and menu display used during DVD playback can be set in advance. Optional display of the multiple angle mark, viewer restriction and other functions can also be set.

1. Touch \( \text{ } \) on the DVD operation screen.
2. Touch \( \text{SET} \).
3. Touch \( \text{SETUP} \).
   - The SET UP screen will be displayed.
4. Touch any of the touch switches. Settings can be made for the following items.

<table>
<thead>
<tr>
<th>Touch switch</th>
<th>Function</th>

<td>114</td>
</tr>
<tr>
<td>VIDEO OUT</td>
<td>Sets screen size.</td>
<td>115</td>
</tr>
</tbody>
</table>
How to use the DVD player

Setting the audio language

The preferred language for the video being played can be selected.

1. Touch AUDIO LANGUAGE on the SET UP screen.

2. Touch the preferred language.
   - Touching OTHER enables setting of a language other than those displayed on the screen.

Input a code

1. Touch OTHER on the AUDIO LANGUAGE setting screen.

2. Input a language code.
   - Refer to "Table of language codes" on page 116 for language codes.

3. Touch ENTER.
Subtitle language setting

The preferred subtitles for the video being played can be selected.

1 Touch **SUB TITLE** on the SET UP screen.

2 Touch the preferred language.
   - Touching **OTHER** enables setting of a language other than those displayed on the screen.
   - Touching **OFF** plays the video with no subtitles on the screen.

Input a code

1 Touch **OTHER** on the SUB TITLE setting screen.

2 Input a language code.
   - Refer to "Table of language codes" on page 116 for language codes.

3 Touch **ENTER**.

Language switching cannot be performed if the selected language is not recorded on the disc.
How to use the DVD player

Menu language setting

Allows selection of a preferred menu language from those recorded on the disc.

1 Touch **MENU LANGUAGE** on the SET UP screen.

2 Touch the preferred language.
   - Touching **OTHER** enables setting of a language other than those displayed on the screen.

Input a code

1 Touch **OTHER** on the MENU LANGUAGE setting screen.

2 Input a language code.
   - Refer to "Table of language codes" on page 116 for language codes.

3 Touch **ENTER**.
Setting display of multi-angle mark (angle selection mark)

The multi-angle mark can be set to display/not display for the video being played.

1. Touch **ANGLE INDICATOR** on the SET UP screen.
   - Each time ANGLE INDICATOR is pressed, the condition will switch between "ON" and "OFF".

2. Touch **ENTER**.

- **ATTENTION**
  - Language switching cannot be performed if the selected language is not recorded on the disc.
  - Setting multi-angle mark display to "ON" will display the multi-angle mark in the upper right corner of the screen when multiple angles are available on the disc.
How to use the DVD player

Viewer restriction setting

This function allows restriction of viewing so that discs with adult themes or violent scenes will not be available to children. Viewer restriction can be set at different levels to match restriction ratings.

1. Touch **PARENTAL SETTING** on the SETUP screen.
2. Enter a password (4 digits) by touching one number at a time.
3. Touch **ENTER**.
4. Touch the preferred restriction level.
5. Touch **ENTER**.

- If you touched **ENTER** after inputting a wrong password, eject the disc once to set the viewer restriction setting again.

- Restriction cannot be set for discs not having a viewer restriction level recorded.
- Be sure to enter a password number. If a number is not entered, setting of viewer restriction will not be possible.
- The password to be shown in the upper section will be displayed as ---- when a password has not yet been set.
- Once the password has been set, the password will be required for subsequent use of this function. Please do not forget the password. If the password is forgotten, the default condition (no password set) can be restored by touching **CLEAR** 10 times.
- Viewer restriction levels are classified in 3 types.
  - Level 1 ................. Plays only DVD software intended for children. (Playing of DVD software intended for general audiences or adult audiences is prohibited.)
  - Level 2 - 7 ............ Plays only DVD software intended for children or general audiences. (Playing of DVD software intended for adult audiences is prohibited.)
  - Level 8 ................. Plays all DVD software. (Factory setting)
Changing video output

1 Touch VIDEO OUT on the SETUP screen.
   - Each time VIDEO OUT is pressed, the screen size will be changed in the order shown below.

   16:9 → 4:3 letter box → 4:3 pan & scan

2 Touch ENTER.
   - **16:9**
     The video is displayed in normal wide size. DVD software recorded in 4:3 size will be displayed with black left and right edges or will be expanded to the left and right.
   - **4:3 (letter box)**
     The video is displayed with black upper and lower edges. DVD software recorded in 4:3 size will be displayed exactly at screen size (4:3).
   - **4:3 (pan & scan)**
     The video is displayed with right and left edges cut off. DVD software recorded in 4:3 size will be displayed exactly at screen size (4:3).

---

**ATTENTION**

When another monitor such as the rear seat monitor is being used, the size of the video being displayed in the rear seat monitor will differ according to the video output size that is set by this main unit (front).

---

**Caution**

Viewing of wide screen modes is permitted when limited to the personal entertainment of the user, but caution is required when using technologies such as image compression and expansion for the purpose of commercial benefit or public presentation may infringe upon the rights of the copyright holder being protected by applicable copyright law.
How to use the DVD player

**Table of language codes**

These codes are used to specify the language for audio tracks, subtitles and on-screen menu displays.

How to use the VTR

Connecting a VTR deck enables watching of video. Videos can be played only if the vehicle is completely stopped in a safe location with the parking brake set and the ignition switch turned to ON or ACC. (Only sound can be heard if a VTR is played while the car is in motion.)

Viewing the VTR

1. Press **MENU**.
2. Touch **SOURCE**.
3. Touch **VTR**.
   - The VTR screen will be displayed.
   - Press **AV** or touch the screen to display the VTR operation screen.
   - By touching **ENTER** on the VTR operation screen, the display will show video again.

Switching the VTR setting screen

Various settings mentioned below can be made by switching to the VTR setting screen.

- Tone control such as EQ and POS.
- Switching the screen mode (wide mode)

1. Touch **SET** on the VTR operation screen.
   - By touching **BACK** the display will return to the VTR operation screen.
Turning off the VTR mode

1 Press **MENU**.

2 Touch **AUDIO OFF**.
   - Pressing PWR again will resume playback.
   - Video can also be played by touching **SOURCE** and then touching **VTR**.

**ATTENTION**

- After switching to the VTR operation screen, touch switches will be displayed for about 6 seconds. Pressing **AV** will display them again.
- The VTR operation screen will be displayed by touching the screen, even when the VTR is playing.
- Depending on the kind of devices connected, the video image may not be displayed correctly.
How to use the TV

The unit can be used as a TV if a TV tuner (sold separately) is connected to the unit. For safety reasons, the TV can be viewed only when the ignition is switched to ON or ACC and the vehicle is completely stopped with the parking brake set. If TV mode is selected while the vehicle is in motion, or while the display is closed, only sound will be output.

Watching a TV

1. Press **MENU**.
2. Touch **SOURCE**.
3. Touch **TV**.

Selecting channels

**Manual selection**

1. Press **/> / ▲** or **< / ▼**.
   - Pressing the switch once moves the channel one step up or down.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>/&gt; / ▲</strong></td>
<td>Raises the channel</td>
</tr>
<tr>
<td><strong>&lt; / ▼</strong></td>
<td>Lowers the channel</td>
</tr>
</tbody>
</table>
Automatic selection

1 Press and hold ➕ / ▲ or ➖ / ▼ until you hear a beep.
   • The channel that is closest to the current channel will be searched for automatically, and searching will stop when the channel is received. To stop the search before a channel is found, press the button again.

Selection using preset switches

1 Touch a preset switch that already has a channel recorded.
   • See “Saving channels” shown below for more information.

After switching to the TV operation screen, touch switches will be displayed for about 6 seconds. Touch the screen to display them again.
How to use the TV

Saving channels

There are two modes for saving channels, manual and AUTO.P. These modes operate independently.

**Saving manually**

Make sure “AUTO.P” is not displayed in the upper part of the screen.

- If displayed, touch AUTO.P to switch to manual.

1. Use manual tuning or automatic tuning to select the channel to be saved.

2. Choose a preset switch and touch it until you hear a beep.
   - The channel is set. Touch the preset switch to tune in the selected channel.

**Saving with AUTO.P**

1. Touch AUTO.P until you hear a beep.
   - The AUTO.P function will activate and start automatically selecting channels. You will hear a beep when the automatic selection of channels is completed.
   - Touch AUTO.P again to return to the channels originally saved.

**Changing stations saved by AUTO.P**

1. Use manual tuning or automatic tuning to select the channel to be saved.

2. Touch the preferred preset switch until you hear a beep.
About AUTO.P

Because the AUTO.P function can be used to temporarily save channels for the preset switches, channels saved manually will remain in memory even if AUTO.P is used. Manually saving channels that are used regularly allows them to be restored even after AUTO.P has been used, such as after traveling.
Touching AUTO.P while AUTO.P is operating or after it has been used will return the preset memories to their previous settings. (The channels saved with AUTO.P will be deleted.) The diagram below shows how to switch between AUTO.P and manual.

- AUTO.P may not automatically receive channels if TV waves in the surrounding area are weak.
- A frequency saved with the tuning switch may not match the channel saved with AUTO.P even though the signal is received from the same station.
- Due to conditions for receiving TV waves, saved channels may differ even when the AUTO.P switch is operated repeatedly in the same location.
- Up to eight channels with good signal reception are automatically saved in channel order (low to high).
- When less than eight channels capable of reception are found, nothing is saved for the remaining preset switches.
How to use the TV

Switching the TV setting screen
Various setting mentioned below can be made by switching to the TV setting screen.
- Switching the display mode (wide mode)
- Memorizing channel number manually.

1 Touch SET.
   - By touching BACK, the display will return to the TV operation screen.

Turning off the TV mode

1 Press MENU.

2 Touch AUDIO OFF.
   - Touching AUDIO OFF again on the MAIN MENU screen to turn on the TV and resume reception of the channel received before power was turned off.
How to use the DUAL PLAY

The DUAL PLAY function provides another audio system (DVD, TV, CD, MP3/WMA) specially for rear seat passengers by using the optional rear seat monitor.

Setting the rear seat monitor
Setting of rear seat monitor can be made.

1. Press **MENU**.

2. Touch **INFO**.

3. Touch **RSE** on the INFORMATION screen.

4. Touch **ON** or **OFF** for DUAL PLAY.
   - **ON**: The rear seat monitor provides audio and video separately from the front seats.
     - When **DISC** is selected, DVD, CD or MP3/WMA will be played.
     - When **TV** is selected, the TV broadcasting will be received.
   - **OFF**: The rear seat monitor does not provide audio and video.
     - When the DVD, TV or VTR is selected for front seats, the same audio/video as the front seats will be output.
     - When the DUAL PLAY is set to ON, the audio for rear seat passengers can be operated with the optional remote control [RRC106].

5. Touch **ENTER**.
   - In the DUAL PLAY mode, the combinations of the Audio functions that can be selectable are as following:

<table>
<thead>
<tr>
<th>Selected Audio mode for Front seat</th>
<th>Selected Audio mode for Rear seat</th>
</tr>
</thead>
<tbody>
<tr>
<td>• AM/FM (analog broadcasting)</td>
<td>• DISC (DVD·CD·MP3/WMA)</td>
</tr>
<tr>
<td>• DISC (DVD·CD·MP3/WMA)</td>
<td>• TV</td>
</tr>
<tr>
<td>• TV</td>
<td>• DISC (DVD·CD·MP3/WMA)</td>
</tr>
<tr>
<td>• HD Radio</td>
<td></td>
</tr>
<tr>
<td>• SIRIUS satellite radio</td>
<td>• TV</td>
</tr>
<tr>
<td>• XM satellite radio</td>
<td></td>
</tr>
<tr>
<td>• iPod</td>
<td></td>
</tr>
<tr>
<td>• CD changer</td>
<td>*TV cannot be selected.</td>
</tr>
<tr>
<td>• VTR</td>
<td></td>
</tr>
</tbody>
</table>

- The **TV** button is displayed only when the optional TV tuner is connected.
- The audio for rear seat passengers is output from rear monitor built-in speakers.
Operating the rear seat monitor

The rear seat monitor can be operated using a dedicated remote control.

Precautions in use of the remote control

- Be careful when handling the remote control, especially because it is small and light. Dropping or striking it hard may damage it, wear out the battery or cause a malfunction.
- Keep the remote control free of moisture, dust and water. Do not subject it to shock.
- Do not place the remote control unit where it will get hot, such as on the dashboard or near a heater vent. Allowing the remote control unit to overheat may warp its case or cause other problems.
- Do not operate the remote control unit while driving because doing so could cause an accident.
- When using the remote control, point it directly at the remote control light receptor on the main unit.
- The light receptor may not operate correctly if it is exposed to bright light such as direct sunlight.
- Remove the batteries from the remote control unit whenever it is not to be used for a long time.

Cleaning the remote control

- Use a dry cloth to keep the unit clean. If the remote control unit gets extremely dirty, clean it with a cloth moistened in diluted liquid detergent. Do not use alcohol or thinner; these compounds may damage the finish.
- In no event should benzine or thinner be used. These substances will damage the case or finish.
How to use the DUAL PLAY

How to play CD

The remote control is operable only when CD is inserted in the disc slot.

Listening to CD

1. Press ▶.
   - It will start playing.

Selecting a song

You can select a song you want to hear.

1. Press ◀◀ or ▶▶.
   - ◀◀: Selects previous song.
   - ▶▶: Selects next song.

Fast-forwarding/rewinding

It is possible to fast-forward/rewind the song played currently.

1. Hold down ◀◀ or ▶▶.
   - ◀◀: Rewinds.
   - ▶▶: Fast-forwards.
   - The main unit will continue to fast-forward (rewind) until your finger is removed from the switch.
Repeating a song

1 Press \textbf{REPEAT}.

- Pressing \textbf{REPEAT} once will cause repeating of the song until the function is canceled.
- Pressing \textbf{REPEAT} again will cancel repeating of the song.

Pausing a song

1 Press \textbf{II}.

- Pressing \textbf{II} will restart playing the song.

Stopping a song

1 Press \textbf{\textendash}. 

How to use the DUAL PLAY

How to play MP3/WMA

The remote control is operable only when CD (MP3/WMA) is inserted in the disc slot.
- For details of MP3/WMA, refer to “About MP3/WMA” (on page 77).

Playing MP3/WMA

1. Press .
   - It will start playing.

Selecting a folder

A folder located within a disc can be selected.

1. Press or .
   - :Selects previous folder.
   - :Selects next folder.

Selecting a music file

A music file located within a folder can be selected.

1. Press or .
   - :Selects previous song.
   - :Selects next song.
Fast-forwarding/rewinding

It is possible to fast-forward/rewind the song played currently.

1 Hold down \[ \langle \langle \text{ or } \rangle \rangle \].

- \[ \langle \langle \text{ : Rewinds.     \}
- \[ \rangle \rangle \text{ : Fast-forwards.  \}
  The main unit will continue to fast-forward (rewind) until your finger is removed from the switch.

Repeating the same music file

1 Press \[ \text{REPEAT} \].

- Pressing \[ \text{REPEAT} \] once will cause repeating of the song until the function is canceled.
  Pressing \[ \text{REPEAT} \] again will cancel repeating of the song.

Pausing a song

1 Press \[ \text{II} \].

- Pressing \[ \text{} \] will restart playing the song.

Stopping a song

1 Press \[ \text{} \].
How to use the DUAL PLAY

How to play DVD

The remote control is operable only when DVD is inserted in the disc slot.

- For details of DVD operation, refer to “Before using the DVD player” (on page 94).

Watching a DVD

1 Press \( \gg \).
   - It will start playing.

Fast-forwarding/rewinding

It is possible to fast-forward/rewind the video played currently.

1 Hold down \( \ll \) or \( \gg \).
   - \( \gg \):Rewinds
   - \( \ll \):Fast-forwards
     The main unit will continue to fast-forward (rewind) until your finger is removed from the switch.

Playing the video in slow motion

1 Press \( \text{SLOW} \).
   - Pressing \( \gg \) will cancel the slow motion.
Pausing the video

1 Press II.

- Pressing ▶ will restart playing the video.

Stopping the video

1 Press ▼.
How to use the DUAL PLAY

How to operate the DUAL PLAY

It is possible to use the menu recorded on the disc.

1. Press **MENU** or **TOP MENU**.
   - The disc menu or the TOP MENU screen will be displayed.

2. Press **▲**, **▼**, **◄**, or **►** to select the video to play.

3. Press **ENTER**.
Selecting the video

A video that you want to watch can be searched by its title or chapter.

Searching a video by chapter

- Searching a video by manually

   1 Press \( \leftarrow \) or \( \rightarrow \).

      - \( \leftarrow \) : Select previous chapter
      - \( \rightarrow \) : Select next chapter

- Searching a video by chapter number

   1 Press \( \text{SEARCH} \) to enter the chapter search mode.
      - The chapter number entering screen will be displayed.
      - Each time the \( \text{SEARCH} \) is pressed, the search mode will be switched in the order shown below.

   2 Use a numeric keypad (0 to 9) to enter the chapter number.
      - If you have made a mistake, press \( \text{CLEAR} \) to delete the number that you have entered.

   3 Press \( \text{ENTER} \).
How to use the DUAL PLAY

Searching a video by title number

1 Press **SEARCH** to enter the title search mode.
   - The title number entering screen will be displayed.
   - Each time the **SEARCH** is pressed, the search mode will be switched in the order shown below.

   ![Diagram of search modes]

2 Use a numeric keypad (0 to 9) to enter the title number.
   - If you have made a mistake, press **CLEAR** to delete the number that you have entered.

3 Press **ENTER**.

Repeating the same chapter

1 Press **REPEAT**.
   - Pressing **REPEAT** once will cause repeating of the video until the function is canceled. Pressing **REPEAT** again will cancel repeating of the video.
Switching between screen display and audio

It is possible to change the language for subtitles, the language for audio and the display angle for the video being played.

Switching the video angle

When several angles of a scene are recorded on a disc, the angle can be switched.

1. Press **ANGLE**.
   - The angle number will be displayed.
   - Each time the **ANGLE** is pressed, the angle number will change and the angle of video will be switched.

Switching subtitle languages

When subtitles in several languages are recorded on a disc, the subtitles can be switched.

1. Press **SUB TITLE**.
   - The subtitle number will be displayed.
   - Each time the **SUB TITLE** is pressed, the subtitle number will change and the subtitle language will be switched.

Switching dubbed audio language

When dubbed voices in several languages are recorded on a disc, the voices can be switched.

1. Press **AUDIO**.
   - The audio number and language will be displayed.
   - Each time the **AUDIO** is pressed, the audio number will change and the language of voices being played will be switched.
How to use the DUAL PLAY

Watching a restricted DVD

When a restricted DVD is inserted, the password entering screen is displayed. Enter the password to watch the restricted DVD.

1 Use a numeric keypad (0 to 9) to enter the password.
   • If you have made a mistake, press CLEAR to delete the number that you have entered.

2 Press ENTER.

• For details of parental restriction and password, refer to "Viewer restriction setting" (on page 114).
How to watch TV

It is operable when an optional TV tuner is connected.

Selecting a channel

Selecting a channel manually

1 Press ▼ or ►.

- ▼: Channel down (descending).
- ►: Channel up (ascending).

ATTENTION
The TV channel number is not displayed on the rear seat monitor.
About the steering wheel switches

On vehicles equipped with steering wheel switches, these easy-access switches can be used to perform the main audio and other operations.

- For details of the steering wheel switch, please contact your local dealer.
- This function may not be used depending on the vehicle type.

MEMO
Precautions in use of the remote control

- Be careful when handling the remote control, especially because it is small and light. Dropping or striking it hard may damage it, wear out the battery or cause a malfunction.
- Keep the remote control free of moisture, dust and water. Do not subject it to shock.
- Do not place the remote control unit where it will get hot, such as on the dashboard or near a heater vent. Allowing the remote control unit to overheat may warp its case or cause other problems.
- Do not operate the remote control unit while driving because doing so could cause an accident.
- When using the remote control, point it directly at the remote control light receptor.
- The light receptor may not operate correctly if it is exposed to bright light such as direct sunlight.
- Remove the batteries from the remote control unit whenever it is not to be used for a long time.

Cleaning the remote control

- Use a dry cloth to keep the unit clean. If the remote control unit gets extremely dirty, clean it with a cloth moistened in diluted liquid detergent. Do not use alcohol or thinner; these compounds may damage the finish.
- In no event should benzine or thinner be used. These substances will damage the case or finish.

TU, DISC and AUX buttons do not work.
Turning the power on/off

When the power is turned on, the state used when the power was turned off such as CD and tuner will be restored.

1 Press PWR.
   - The power turns on or off each time the button is pressed.

ATTENTION
When the main unit is shut down, the remote control will not work.

Adjusting the audio volume

1 Press or .
   - button: Increases the volume.
   - button: Decreases the volume.

Muting the Volume

Press MUTE to cut the volume or restore it instantly.
How to use an optional remote control (RMC105)

Switching playback modes

1. Press **MODE**.
   - Press the button to switch modes in the following sequence:
     - AM → FM → CD(MP3/WMA) → (CD Changer) → DVD → (TV) → (VTR) → (SIRIUS) → (XM) → (iPod)

How to play the tuner

Select the tuner mode first.

Selecting a station (manually or automatically)

A short press of the button will allow manual station tuning. Pressing for more than one second will start automatic tuning.

1. Press **.dup**.
   - **button**: Tunes to higher frequency stations.
   - **button**: Tunes to lower frequency stations.

Selecting preset stations

A total of six stations may be selected (preset tuning) out of those already set in memory through the main unit. (Refer to the Section "Saving radio stations" on page 53)

This function is not available for TV.

1. Press ** Pre • CH □ □**.
   - ** button**: Select the next higher number preset button.
   - ** button**: Select the next lower number preset button.
How to play CDs

Switching CD Changer modes

Select the CD Changer (optional) mode first.

1 Press **BAND**.

- When two CD changers are connected, press **BAND** to change modes from CD changer 1 → CD changer 2.

Advancing to the next track or returning to the beginning of the track being played

Select the CD or CD Changer (optional) mode first.

1 Press **<< TRACK >>**.

- **>>** button: Skips to the next track.
- **<<** button: Returns to the beginning of the track being played. (Press repeatedly to move to previous tracks.)

**ATTENTION**

Hold **>>** down to fast forward, or **<<** to rewind through the track being played.

Skipping to the next or previous disc

Select the CD or CD Changer (optional) mode first.

1 Press **DISC **.

- **** button: Selects the next higher number disc.
- **** button: Selects the next lower number disc.
How to use an optional remote control (RMC105)

Replacing the battery

To prevent accidents, store batteries out of the reach of children. If a child has swallowed one, consult a doctor immediately.

Use two AAA-size batteries.

1. Remove the back cover of the remote control unit by gently pressing and sliding it in the direction indicated by the arrow.

2. Install the two batteries provided into the compartment as illustrated.

3. Return the back cover into place by sliding it in the direction indicated by the arrow.

• The battery life is approximately one year. If the remote control unit does not operate correctly or if the button lamp gets dim, replace the batteries.
• Be sure to orient the batteries correctly so that the positive and negative poles match the diagram.
• Do not use one new battery and one old one; use two new batteries.
• Only use two of the same type of battery.
• If any liquid is seen leaking from the batteries, remove both batteries and dispose of them properly. Thoroughly clean the battery compartment with a dry cloth. Then install new batteries.

## Before asking for repairs

Slight differences in operation can sometimes be mistaken for malfunctions, so check the following table before asking for any repairs.

If the following fail to solve the problem, contact the place of purchase.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible reason</th>
<th>Corrective action</th>
</tr>
</thead>
<tbody>
<tr>
<td>The screen is dark for a brief period when the power is turned on at low temperatures.</td>
<td>This is a characteristic of LCDs.</td>
<td>This is not a malfunction. Wait for a brief period.</td>
</tr>
<tr>
<td>The display is distorted for a brief period after the power is turned on.</td>
<td>This is a characteristic of LCD backlighting.</td>
<td>This is not a malfunction. The display will stabilize after a brief period.</td>
</tr>
<tr>
<td>No sound comes out.</td>
<td>Volume is poorly adjusted or MUTE is functioning.</td>
<td>Press the volume switch and check volume. Or cancel MUTE.</td>
</tr>
<tr>
<td>Sound comes out of only one side (left or right, front or back).</td>
<td>A speaker wire is disconnected.</td>
<td>Check the connections of the speaker wires.</td>
</tr>
<tr>
<td>Sound quality does not change even after making adjustments.</td>
<td>The adjusted audio quality is not included in the radio broadcast or disc.</td>
<td>Check by changing the radio station or disc.</td>
</tr>
<tr>
<td>A CD/DVD will not go into the deck.</td>
<td>Power is not turned on.</td>
<td>Turn the vehicle ignition switch to [ACC] or [ON].</td>
</tr>
<tr>
<td>A CD/DVD cannot be played.</td>
<td>A disc is already inserted and you are trying to insert a second disc.</td>
<td>Eject the previously inserted CD/DVD and insert the preferred CD/DVD.</td>
</tr>
<tr>
<td>There is water condensation in the equipment.</td>
<td>There is a large scratch or warp in the CD/DVD.</td>
<td>Insert a different CD/DVD.</td>
</tr>
<tr>
<td>The CD/DVD is very dirty.</td>
<td>The CD/DVD is upside down.</td>
<td>Insert the CD/DVD with the proper orientation.</td>
</tr>
<tr>
<td>A non-supported type of CD/DVD has been inserted.</td>
<td>A CDchanger1/CDchanger2 is not displayed on the screen.</td>
<td>Insert a CD/DVD that is supported by the deck. (Refer to pages 20.)</td>
</tr>
<tr>
<td>Audio is output, but not video.</td>
<td>The screen has been turned off with the screen OFF button.</td>
<td>Press AV or MAP. (Refer to page 47.)</td>
</tr>
<tr>
<td>Audio is output, but not DVD video. (With vehicle stopped.)</td>
<td>The emergency / parking brake has not be set.</td>
<td>Set the emergency / parking brake.</td>
</tr>
<tr>
<td>Neither video nor audio is output.</td>
<td>The vehicle ignition switch has not been turned on.</td>
<td>Turn the vehicle ignition switch to [ACC] or [ON].</td>
</tr>
<tr>
<td>There is a point of light on the display.</td>
<td>The connection wires and cables are not completely connected.</td>
<td>Check the connections to each connection wire and cable.</td>
</tr>
<tr>
<td>At least 99.99% of the pixels on the LCD panel are effective, but it is possible that 0.01% of the pixels may not light or may stay lighted.</td>
<td>This is not a defect, so please use the equipment in this condition.</td>
<td></td>
</tr>
<tr>
<td>Term</td>
<td>Description</td>
<td></td>
</tr>
<tr>
<td>--------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
<td></td>
</tr>
<tr>
<td>CD-R</td>
<td>This is a disc that can only be recorded once. Recorded data cannot be deleted. There are two types of CD-R, one having capacity of 650MB (74 minutes of music), the same as a regular CD, and the other having capacity of 700MB (80 minutes of music).</td>
<td></td>
</tr>
<tr>
<td>CD-DA</td>
<td>This disc is the standard for recording and playing of music data. One track is recorded with one song, and a maximum of 74 minutes can be used with the CD.</td>
<td></td>
</tr>
<tr>
<td>CD-RW</td>
<td>This disc uses a phase transformation method that enables recording and deleting of data as many times needed. Capacity is 700MB (80 minutes of music).</td>
<td></td>
</tr>
<tr>
<td>EQ (Equalizer)</td>
<td>This enables setting of stronger or softer playing of sounds throughout the high to low range of the sound. Levels can be adjusted to personal preference, enhancing enjoyment of the music.</td>
<td></td>
</tr>
<tr>
<td>MP3</td>
<td>&quot;MP3&quot; is the abbreviation for &quot;MPEG Audio Layer 3,&quot; which is the standard format for compression of audio data. MP3 technology compresses sound in the range inaudible to the human ear, producing a file one tenth the size of the original.</td>
<td></td>
</tr>
<tr>
<td>LPCM</td>
<td>This is an abbreviation for Linear Pulse Code Modulation, a signal recording method used with music CDs. A music CD is recorded at 44.1kHz/16 bit, but a DVD is recorded at 48kHz/16 bit – 96kHz/24 bit, enabling a DVD to be played with higher sound quality than a music CD.</td>
<td></td>
</tr>
<tr>
<td>MPEG</td>
<td>This is an abbreviation for Moving Picture Experts Group and is pronounced &quot;empeg&quot;. It is the international standard for moving image compression. With DVDs, this method is also used to compress and record digital audio.</td>
<td></td>
</tr>
<tr>
<td>Copy Control CD</td>
<td>This is a CD that has controls for preventing computers from copying and ripping (taking audio information recorded on a compact disc and using it as data to create a file).</td>
<td></td>
</tr>
<tr>
<td>UDF</td>
<td>This is one format for use with optical discs not reliant on the OS. It is used with media such as DVD and CD-RW.</td>
<td></td>
</tr>
<tr>
<td>Track</td>
<td>The single division for a song on a music CD is called a track.</td>
<td></td>
</tr>
</tbody>
</table>
**Viewing Restriction**
This is a DVD video function that "Restricts playing of discs that support viewing restrictions, in accordance with the regulated levels of each country." Restrictions differ by DVD video and may completely prevent playing of the video or may skip or insert alternate scenes for extreme scenes.

**Title**
This is the largest unit for divisions of video or songs recorded on a DVD video. Usually a single movie is treated as a title by video software and a single album (or song) is treated as a single title by music software. The consecutive numbers attached to titles are called title numbers.

**Chapter**
This is a unit for divisions of video or songs recorded on a DVD video, but it is a smaller unit than a title. A single title is made up of several chapters, and the consecutive numbers attached to chapters are called chapter numbers.

**Multi-Angle**
This is one feature of DVD video, where viewpoints of the same scene are changed by recording from several different angles (camera positions), allowing the viewer to select the preferred angle.

**Multi-Language**
This is one feature of DVD video, where the same scene is recorded with several different languages and subtitles, allowing the viewer to select the preferred language.

**Region Code**
DVD players and DVD discs have a region code that enables playing by geographic marketing regions, and a disc cannot be played if the number recorded on the disc is not included in the region codes of the player. Refer to page 96 for details on region codes.
